EDUCATION

University of Glasgow, PhD in Economics — *Oct. 2024 - Oct. 2027 (expected)*
Supervisors: Alex Trew & Tuuli Vanhapelto

Universitat Pompeu Fabra, Visiting PhD Student — *Sep. 2025 - Dec. 2025*
Host: Dávid Krisztián Nagy

University of Glasgow, MRes. in Economics (*with Distinction*) — *Sep. 2022 - Sep. 2024*

Beijing Institute of Technology, MRes. in Energy & Climate Economics — *Sep. 2019 - Jun. 2021*

Huazhong Agricultural University, B.A. in Agriculture Economics — *Sep. 2015 - Jun. 2019*

JOB MARKET PAPER

Building for Promotion: Local Political Incentives and Spatial Structural Change

Abstract: Local governments provide most infrastructure, but the officials who run them face political incentives that need not align with residents' welfare. This paper studies how local officials' career promotion incentives shape the spatial allocation of infrastructure and structural change in China. To estimate the effects of these incentives, I exploit plausibly exogenous rotations of their superiors and find that prefecture leaders who unexpectedly lose promotion prospects cut infrastructure investment, which in turn slows the transition out of agriculture. To measure the promotion concerns and quantify aggregate implications of this mechanism, I develop a quantitative spatial model in which local officials value both current public spending and next-period growth-oriented promotion. These promotion incentives lead more than half of prefectures to overinvest relative to what a local planner would. Removing these incentives would cause large distributional effects across prefectures, although the aggregate welfare effect is modest. Yet the weakening of career incentives over 2000–2020 slowed industrialization, cutting the rise in the manufacturing employment share by 9.2%.

WORKING PAPERS

1. **Gender Skill Gaps and Gender Inequality Along the Wage Distribution** (with Michele Battisti, Alexandra Fedorets, and Lavinia Kinne), Revise and resubmit, *Labour Economics*

Abstract: Gender differences in labour market outcomes vary substantially along the wage distribution, with both "glass ceilings" and "sticky floors". Using direct measures of adult numeracy from the international PIAAC dataset, we document gender differences in numeracy skills and their wage returns

along the joint hourly wage distribution. Women at the top have both lower numeracy scores and lower returns to high numeracy than men. In contrast, gender numeracy gaps are small in the lower half of the wage distribution, where women's returns to high numeracy are higher than men's. These patterns are robust to including job and non-job controls and to allowing the returns to these controls to differ by gender, but they are closely related to gender differences in returns to occupations.

2. **Good Money in Bad Times: Indirect Issuance of Banknotes in China, 1905–1936** (with Xin Dong, Debin Ma, Nuno Palma, and Meng Wu)

Abstract: China pioneered paper money in the thirteenth century, yet by the early twentieth century it still lacked a unified national banknote. From 1905 to 1936, the money supply expanded fivefold despite war, political fragmentation, and the absence of an effective central bank. We highlight a neglected mechanism: indirect banknote issuance (*lingquan*), whereby non issuing banks deposited reserves with authorized issuers to obtain notes for local circulation. Using newly digitized banking yearbooks and archival evidence, we show that *lingquan* accounted for 12–40% of annual issuance and functioned through a division of labor between major issuing banks and locally embedded native banks.

CONFERENCES AND PRESENTATIONS

2026 (*scheduled): UEA Summer School in Urban Economics (LSE, London), 8th QMUL Economics and Finance Workshop, the 12th Annual Symposium on Quantitative History, Doctoral training in Structural Change, Growth, and Economic Development (Poster), Wealth of Nations at 250 Conference: Understanding Prosperity and Development in the Modern World (Rapporteur), 2nd CREST Urban Workshop*
2025: CREi International Lunch Workshop (UPF, Barcelona), Frontiers of Comparative Development in Historical Perspective (Manchester)

RESEARCH ASSISTANT

Prof. Michele Battisti, University of Glasgow	*Apr. 2025 – Dec. 2025*
Prof. Nuno Palma, University of Manchester	*Apr. 2024 – Jan. 2025*
IESR, Jinan University, Full-time Research Assistant	*Jul. 2021 – Jul. 2022*

TEACHING ASSISTANT

- Macroeconomic Analysis (Honours)	*2024, 2025, 2026 Spring*
- Econometrics 1 (Honours)	*2023, 2024 Fall*
- Machine Learning in Finance with Python	*2024 Spring*

AWARDS AND SCHOLARSHIPS

CoSS Scholarship (MRes+PhD) University of Glasgow	*2022 - 2027*

EXTRA TRAINING

BREAD-IGC virtual PhD-level course on Political Economy	*2026*
Doctoral training in Structural Change, Growth, & Economic Development, Glasgow	*2026*
UEA Summer School in Urban Economics, LSE	*2026*
Econometrics Workshop: Difference-in-Differences with Panel Data, Glasgow	*2026*
The 11th Quantitative History Summer School, Wuhan	*2025*
Workshop on Causal Panel Methods, Glasgow	*2025*

SKILLS

Technical Skill	Julia, Stata, Python, Matlab, R, LaTeX
Language	English (Fluent), Mandarin (Native)
